## Green Lancang-Mekong Initiative: China-Cambodia Cooperation Workshop on Water Pollution Control Demand Wraps Up Successfully

On November 17, 2020, the Green Lancang-Mekong Initiative: China-Cambodia Cooperation Workshop on Water Pollution Control Demand was successfully held both "online and offline". The workshop was organized by the Foreign Environmental Economic Center (FECO), Ministry of Ecology and Environment/Lancang-Mekong Environmental Cooperation Center (LMEC) and Belt and Road Environmental Technology Exchange and Transfer Center (Shenzhen). Present were representatives from the Department of Water Quality Management, Ministry of Environment, Cambodia, and experts from research institutions in China.

At the workshop, LMEC representatives focused on the achievements in the research of water pollution control demand in Cambodia as well as industrial cooperation between China and Cambodia, and analyzed the current wastewater treatment situation and challenges in this regard in Cambodia and discussed the cooperation potential for China and Cambodia in water pollution control.

A representative of the Department of Water Quality Management, Ministry of Environment, Cambodia stated that Cambodia was willing to continue exchanging experience on water pollution control with China, to carefully study China's relevant research findings, and expected that China's research teams could provide more experience and solutions pertaining to urban water pollution control as well as construction of ecological industrial parks for reference.

During the workshop, representatives from Chinese institutions such as Chinese Research Academy of Environmental Sciences and Peking University put forward constructive suggestions for the research project and expressed the hope that the results of the research project could serve regional environmental cooperation and facilitate China-Cambodia industrial cooperation in water pollution prevention and control.
