Lancang-Mekong Environmental Cooperation Strategy and Action Framework 2023-2027 is Officially Launched

On April 25, 2023, the Lancang-Mekong Environmental Cooperation Strategy and Action Framework 2023-2027 was launched in Beijing as one of the activities of the Lancang-Mekong Cooperation Week 2023.

The *Lancang-Mekong Environmental Cooperation Strategy and Action Framework 2023-2027* was jointly launched by Sun Xuefeng, deputy director-general of the Department of International Cooperation of the Ministry of Ecology and Environment of China; Geng Cong, representative of the Lancang-Mekong Cooperation China Secretariat; Li Yonghong, deputy director-general of the Lancang-Mekong Environmental Cooperation Center (LMEC)/Foreign Environmental Cooperation Center of the Ministry of Ecology and Environment of China; Souksamone Pathammavong, deputy director-general of the Department of Planning and Finance of the Ministry of Natural Resources and Environment of Lao PDR; Aung Kyaw Moe, deputy director-general of the Department of Environmental Conservation of the Ministry of Natural Resources and Environmental Conservation of Myanmar, as well as representatives from the Ministry of Environment of Cambodia, the Ministry of Natural Resources and Environment of Thailand, and the Embassy of Vietnam in China.

At the launch, Li Yonghong, deputy director-general of the Lancang-Mekong Environmental Cooperation Center (LMEC)/Foreign Environmental Cooperation Center of the Ministry of Ecology and Environment of China, recognizes the fruitful results for Lancang-Mekong environmental cooperation in the past five years under the support of Lancang-Mekong Countries and partners. Since January 2022, the Center has started the preparation of strategic planning for the next phase to enhance regional cooperation. Consensus was finally reached on the *Lancang-Mekong Environmental Cooperation Strategy and Action Framework 2023-2027* after several rounds of consultations with joint efforts made by the Mekong countries. It is believed that, in the next five years, Lancang-Mekong environmental cooperation will facilitate the implementation of the Global Development Initiatives (GDI) and the UN 2030 Sustainable Development Goals in the region through five priority areas—roundtable dialogue and capacity building, ecosystem management and biodiversity conservation, climate change adaptation and mitigation, environmental quality improvement, knowledge sharing and awareness raising—under the guidance of the environmental cooperation strategies for the next phase.

The Lancang-Mekong Environmental Cooperation Strategy and Action Framework 2023-2027 is the top-level document for the second phase of Lancang-Mekong environmental cooperation. The release and implementation of the Framework will serve as important support to the Fourth LMC Leaders' Meeting and the Five-Year Plan of Action on the Lancang-Mekong Cooperation (2023-2027).
